Higher Education

MIS Duration:

- 2 Years Full-time
- 16 Units (160 Credit Points)

Master of Information Systems

Specialisation in cyber security, data analytics and artificial intelligence

The Master of Information Systems (MIS) program is designed to meet the Australia Computer Society’s (ACS) requirements for course accreditation. The course aims to produce Information Systems (IS) graduates who will be eligible to gain employment in a range of different and modern areas of information technology and information systems.

The course is built on providing students with foundational knowledge of core and key areas of information technology and systems. Specialisation units in the second year provide opportunities for study in current important IS areas including cyber security, data analytics and artificial intelligence.

The course is characterised by an end of program capstone project comprising two connected units. These capstone units provide students with the opportunity to work in a team to solve a complex real-world business information systems problem, drawing from the knowledge and skills acquired over the whole program of study.

Mode of Delivery: On Campus

Campus Locations: Parramatta NSW
Melbourne VIC

2 Sorrell Street, Parramatta,
NSW 2150, Australia

123 Lonsdale Street, Melbourne,
VIC 3000, Australia
